Convertible Packaged Gas/Electric**

FEATURING...

- The Amana MILLION-AIR™ Heat Exchanger with a Lifetime Heat Exchanger Limited Warranty
- R-410A Environmentally Friendly Refrigerant
- Lifetime Compressor Limited Warranty

High-Efficiency and High-Performance Comfort—Year-Round!

No matter the season, your family will enjoy the utmost in indoor comfort with your new Amana® brand 15 SEER Packaged Gas/Electric Unit, our premier gas-electric product. And with the energy savings and durability this packaged unit provides, that comfort will extend all the way to your pocketbook!

Your new Amana brand 15 SEER Packaged Gas/Electric Unit combines the best of the Amana brand's furnace and condensing unit technologies, all in one self-contained "package." With its advanced, high-efficiency scroll compressor, the unit's air conditioner reaches efficiencies of 15 SEER, and the heating component provides efficiencies of up to 80% AFUE. Add to that the durability provided by the Amana brand's stainless-steel, tubular Million-Air™ heat exchanger, and you have a unit designed to provide you with fuel-efficient comfort for years to come.

We're so confident in the quality of your Amana brand 15 SEER Packaged Gas/Electric Unit that we cover both its heat exchanger and its compressor with a Lifetime Limited Warranty.* Not many companies will go to such lengths to reassure the buyer of the quality of their products. But few make a product close to the quality of the Amana brand 15 SEER Packaged Gas/Electric Unit. Amana lasts and lasts and lasts.

Million-Air™ Heat Exchanger

The heart of your Amana brand packaged unit's heating technology is its patented Million-Air™ stainless-steel tubular heat exchanger. Formed using our patented dual-diameter pipe and wrinkle-bend technologies, the Million-Air is built to last. One of these heat exchangers has endured almost two million extreme-temperature test cycles—that's about 200 times the industry standard—and it is still going strong.

Ultra-High-Efficiency Scroll Compressor

Delivering outstanding economy, your Amana brand 15 SEER Packaged Gas/Electric unit is built using an ultra-high-efficiency compressor. Thanks to its high-quality compressor, this unit cools efficiently, quietly and dependably, with less wear and tear for longer life

Ultra-Efficient Condensing Coil

Our coil design provides maximum efficiency in minimum space. Aluminum fins are bonded to enhanced copper tubing for more efficient heat transfer. All coils are leak checked electronically and pressure-tested three times to assure reliability.

In addition to using a high-quality coil, we also include a filter drier to remove any moisture or debris from the system, allowing for longer system life.

Energy Efficiency

A packaged unit's cooling efficiency is indicated by its Seasonal Energy Efficiency Ratio (SEER), which is a measurement of a condensing unit's efficiency developed by the EPA. Your new Amana brand Packaged Gas/Electric Unit offers 15 SEER, one of the highest ratings in the industry. In fact, your Amana brand 15 SEER Packaged Gas/Electric Unit meets the higher standard of the Environmental Protection Agency's (EPA's) Energy Star Program.

The heating efficiency of a packaged gas/electric unit can be determined by its Annual Fuel Utilization Efficiency (AFUE) rating, which indicates what percentage of each dollar of energy purchased is actually used to heat your home. Your new Amana® brand Packaged Gas/Electric Unit offers 80% AFUE, which can translate to significant savings on your energy bills, especially when you consider that many packaged units

*For complete details on warranties, visit www.amana-hac.com.

installed in homes today are 60% AFUE. By shifting from a 60% AFUE packaged unit to an 80% unit, you gain up to 33% in energy efficiency.

R-410A Refrigerant

Your new Amana brand 15 SEER Packaged Gas/Electric Unit will not only provide you with money-saving cooling performance for many years, but it also features R-410A refrigerant. Since this refrigerant does not contain chlorine, it is more environmentally friendly than R-22 refrigerant, which is currently used in most air conditioning systems.

Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of air conditioning compressors!

Built to Last

Your space-efficient Amana brand 15 SEER Packaged Gas/Electric Unit can be ground- or rooftop-mounted. Its cabinet is built using high-quality, heavy-gauge, zinc-coated steel with a weather-resistant powder-paint finish. A stamped steel louvered grille protects the condenser coil, and the unit's subtle color scheme complements nearly all exterior home environments.

Warranty

We're so confident in the lasting power of your Amana brand 15 SEER Packaged Gas/Electric Unit that we protect it with some of the best warranties in the industry. For the original, registered homeowner, we cover both the heat exchanger and compressor in this unit with a Lifetime Limited Warranty. All remaining parts are covered by a 10-Year Limited Warranty. You can rest assured that you've made a wise investment in a product that will last and last and last.

EXTENDED SERVICE PLAN

Major Features

- 15 SEER cooling efficiency, Amana's most efficient packaged unit
- R-410A Refrigerant
- 80% AFUE heating efficiency
- Durable, corrosion-resistant Million-Air™ stainless-steel tubular heat exchanger
- Lifetime Limited Warranty on the heat exchanger and compressor for the original, registered homeowner

- 10-Year Limited Warranty on all other functional parts

- Ultra-high-efficiency scroll compressor
- Attractive louvered cabinet/coil guard
- Quality, powder-paint finish resists fading and corrosion
- Fully insulated blower compartment for quiet operation
- Meets California low-NOx emissions requirements

Amana Quality

Americans have been relying on long-lasting Amana® brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana Heating & Air Conditioning products. With the technology behind our patented Million-Air™ heat exchanger, we remain committed to Amana's legacy of providing consumers with heating and cooling products that are built to last and repeatedly recognized as the brand behind some of America's best HVAC products.

Look to your local Amana brand dealer to obtain expert advice about installation and service.
